

PENSIONS COMMITTEE – 30 SEPTEMBER 2022

Report of the Deputy Chief Executive & Director for Corporate Services

Staffordshire Pension Fund Investment Performance

Recommendation of the Chair

1. That the Pensions Committee note the report at Appendix 2 and the presentation on such to be received from Portfolio Evaluation Limited.

Background

2. The Staffordshire Pension Fund employs Portfolio Evaluation Limited (PEL) to provide independent investment performance measurement services for the Fund's various investments. The performance metrics, which measure the percentage return of the Fund's various investments against an agreed range of benchmarks, are reported to the Pensions Panel each quarter.
3. Performance is reported at a Total Fund level, at an asset class level and at an individual investment manager level and attached at Appendix 2 is an investment performance overview for the period ending 30 June 2022 which includes the financial year ending 31 March 2022. This will help to give the Pensions Committee assurance over the work of the Pensions Panel in its role overseeing the investments of the Fund.
4. It is important to understand that whilst one Funds performance can be measured against its own set of benchmarks, a straightforward comparison of investment returns, and the associated costs, as publicly reported by different pension funds will never be meaningful. This is because there are several variables which also need to be considered, to obtain a like for like comparison. E.g Assets under management, strategic asset allocation, implementation style, benchmarks etc.
